## **DETAILED ACTION**

### ***Claim Objections***

Claims 11-14 are objected to because of the following informalities:

In claim 11, the recitation "preferably" renders the claim indefinite as to whether the limitations that follow are included in the scope of the claims. Claims 12-14 depend from claim 11 and are likewise objected to. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 6, 7, 9, 11 (as best understood), 15, 16, 17, 18 and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Yie, U.S. 4,478,368.

Yie discloses a rotating (col. 13, line 39-50) fluid jet (120) having a mixing chamber (127) with of abrasive particles (at 122) therein, rotational scanning means (col. 13, lines 46-48) for moving the offset impingement area (at 141) along a circular trajectory, and a modulation system (fig 14) having adjustable pumping means (109; col. 14, lines 43-52) and adjustable abrasive conveyor means (111, 112, 113; col. 15, lines 14-17).

***Allowable Subject Matter***

Claims 3-5, 8, 10, 12-14 and 19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Williams, U.S. 2868,509 discloses a similar method of recirculating.

Nussbaumer, U.S. 4,673,312 discloses a similar navigational means.

Hashish et al., U.S. 5,320,289 discloses a similar control system.
